ITTF Meeting
September 22, 2000

Memberships of the LiLI-Z and ILL committees

LiLI-Z

Ruth Funabiki (Chair)
Paul Krause
Dawn Wittman
Paul Holland
Rand Simmons
Frank Nelson
Marcia Beckwith

ILL

Kay Flowers (Chair)
Tom Olsen
Karen Ganske
Joe Reiss
Ann Joslin
Sue Walker

Interlibrary Loan systems

U of I uses OCLC's Direct Request / CLIO
ISU may purchase Endeavor's system
BSU local system based on Access – may purchase a system

ILA Presentation / Exhibit

LiLI ILL Committee will present its Direct Borrowing Agreement (Reciprocal)
LiLI-Z Committee will demo the Virtual Catalog LiLI-Z

Dan will work exhibit

Virtual Catalog (LiLI-Z)

http://lili-z.boisestate.edu/servlet/idaho

add link to Library of Congress
link to consortia members (e.g., LYNX! CIN)
link to web catalogs

Ask Blue Angel to explain the indexing behind various searches

Holdings are appearing in MARC record when downloaded (BSU)

Want to add as many libraries as possible

Small libraries should be encouraged to make their holding available (20%-40% of collection might be unique)

Most efficient way for libraries to automate is to join a network

Virtual Catalog – What do we want?

(RFI to Fretwell Downing regarding its VDX software and similar products from other vendors)

http://www.fdgroup.com/fdiusa   ($60,000 one library $90,000 2 to 9, $115,000 10-19 - $30,000-35,000 hardware $20,000-25,000 installation, 25% maintenance)

Pigasus ($16,000 one library)

http://www.pigasus.com

Illiad ($20,000 one library)

Straight ILL system – marketed by OCLC and others

CLIO

Blue Angel Technologies

RFI specifications
        Able to search both Z39.50 and web (OPACs) servers
        Integrated interlibrary loan
        Shared patron database
        Windows NT preferred
        Number of target servers?
        Search GILS
        Search LiLI databases
        Museums, photo archives…
        Configurable in order for each library to customize routing
        Data gathering and reports
                At the state level
                By individual library or library system
        Standards addressed (ISO)
        Shopping cart approach
        Web accessible
        Each patron can customize search
        Customizable web interface

Cost
Hardware requirements

Profiles

Compare Z Texas and Bath Z39.50 profiles
Probably will adopt Z Texas Profile
Does ALA have a Z39.50 profile preference?
Look at Library of Congress web site
Delay decision until next meeting
Purpose – encourage vendors to conform

Look at
http://www.unt.edu/wmoen/Z3950/MARC21Indexing/Z3950MARCIndexing.htm

Standards of indexing
What fields and subfields should be searchable

Other standards to be investigated
ILL standard
Circulation standard
MARC21

GILS
Indexing government web pages
Dublin Core metadata
Create record and embed metatags in the HTML
Searchable by commercial web engines
Database covering paper and electronic records
Integrating records into automated library systems

Task Force Chair

Janet Higgins
(rotate yearly – can serve multiple, adjacent terms)

Liaison to LiLI Board (and LiLI-Z Committee)

Dan Lester
(rotate yearly – can serve multiple, adjacent terms)

Work plan

Priorities

RFI for Virtual Catalog/ILL Management system
Further development of the LiLI-Z
Adopt profile for Z39.50
Evaluate technology for GILS

Next Steps

Read Z profiles
Rand will draft RFI for the Virtual Catalog
Task Force will review RFI and evaluate
Check with Blue Angel Technology regarding LiLI-Z
Interlibrary loan component
Holdings (call number and owning library displayed)
Merged sets as an option
Dan make HTML changes to LiLI-Z

http://jake.med.yale.edu

indexing title lists covered by databases

Next date

Check for early December date

Meeting evaluation

Liked room
Getting out for lunch
